### DETAILED ACTION

Examiner acknowledges receipt of election and change of address filed 09/11/02.

#### *Election/Restrictions*

The election made in the response of 09/11/02 is not compliant and applicants are accorded another opportunity to provide fully compliant election.

Generic claim 1 is directed to a composite scaffold or prosthesis; the scaffold comprises porous ceramic phase and porous polymer phase. The ceramic is selected from the group listed in claim 13 and the polymer is listed in claims 14-22. Mechanical reinforcement structural materials are listed in claim 9.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed ceramic species and a single disclosed polymer species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a scaffold comprising a ceramic and a polymer is generic.

In the response filed 09/11/02, applicants elected 2 polymers, collagen and aliphatic polyester. It is required that applicants elect one polymer. If applicants elect aliphatic polyester, applicants must further elect (a) homopolymer or (b) copolymer and thus must elect a specific aliphatic polyester homopolymer or copolymer (see claim 16 for guidance).

Applicants are also required to elect a specific mechanical reinforcement structure from one of those listed in claim 9.

In the response filed 09/11/012, applicants failed to provide the claims that read on the elected scaffold/prosthesis. Thus applicants are advised that a reply to this requirement must include an identification of the **species that is elected consonant with this requirement, and a**

**listing of all claims readable** thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

**One ultimate scaffold must be elected.** That is, a scaffold that is fully defined by a single ceramic material and polymer and mechanical reinforcement structure that is embedded in the polymer. Only the scaffold defined by claims must be elected and not an example except if that example is fully defined by the claims.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
